### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims:

1. (Currently Amended): A container having a trapezoidal shape comprising an interior area ~~for, said interior area~~ housing a plurality of vertically stacked wipes ~~substrates~~, the container comprising top and bottom side walls opposing each other said top wall being longer than said bottom side wall, front and back side walls opposing each other and left and right side walls opposing each other, wherein the angle between the front side wall and the bottom side wall is between 95° and 160° and having a dispensing opening located at the intersection between the top side wall and the front side wall, and wherein said plurality of vertically stacked wipes ~~substrates~~ is biased toward the front side wall to assist in positioning an edge of a wipe ~~substrate~~ adjacent the dispensing opening, said container optionally further comprising a wipe ~~substrate~~ holder for storing dispensed wipe ~~substrate~~ between uses, said holder being located on the left side wall or right side wall of the container.
- 2 – 3. (Cancelled)
4. (Previously presented): The container according to claim 1 wherein the container comprises a single piece of material.
- 5 – 8. (Cancelled)
9. (Cancelled)
10. (Currently Amended): The container according to claim 9 1 wherein the dispensing opening further extends vertically downward toward the intersection of the front side wall and bottom side wall.
- 11 – 16. (Cancelled)
17. (Withdrawn): A container according to claim 16, wherein the bottom support portion is included in a spring.
18. (Withdrawn): A container according to claim 17, wherein the spring is adapted to assist in changing the angle of inclination of the bottom support portion depending on the number of substrates housed within the interior area of the container.

Appl. No. 10/075,326  
Atty. Docket No. CM2502

Customer No. 27752

19. (Withdrawn): A container according to claim 17, wherein the spring includes an extension member adapted to engage a face of a substrate to bias a plurality of substrates toward the front side wall.

20. (Withdrawn): A container according to claim 19, wherein the spring comprises a length of material in a Z-shape.

21. (Withdrawn): A container according to claim 20, wherein the spring is attached to a portion of the container at a location adjacent a corner between the bottom side wall and the back side wall.

22. (Withdrawn): A container according to claim 19, wherein the extension member is resilient, and wherein the resilience of the extension member is adapted to maintain engagement of the extension member with a face of a substrate if a number of substrates housed within the interior area of the container changes.

23. (Withdrawn): A container according to claim 17, wherein a first end of the spring is attached to a portion of the container at a location adjacent a corner between the top side wall and the back side wall and wherein a second end of the spring is adapted to traverse along the bottom side wall in a direction from the back side wall toward the front side wall if the number of substrates housed within the interior area of the container changes.

24. (Withdrawn): A container according to claim 23, wherein the spring includes an extension member adapted to engage a face of a substrate.

25. (Withdrawn): A container according to claim 24, wherein the extension member is resilient, and wherein the resilience of the extension member is adapted to facilitate engagement between the extension member and a face of a substrate if the number of substrates housed within the interior area of the container changes.

26. (Withdrawn): A container according to claim 24, wherein the extension member extends away from a portion of the spring at a location between the first end and the second end of the spring.

27-41. (Cancelled)
